Greetings,

I had high hopes that the DOJ would stand up for the American citizen during this trial,  
I was wrong. The DOJ joined others in bowing down to Microsoft and to punish them by  
forcing their 2nd rate software into schools is no punishment at all!,  
in fact it's a favor.

Has the U.S. Government somehow been bought off by MS ??

I do not have the answer to this, only the evidence that there has been no justice at all.

Please stand up and make Microsoft actually pay for their horrible business practices and dishonorable methodology.

Also do not get me wrong, I am for capitolism, making money and the American dream.  
However when they operate their business in the manner Microsoft did and still does,  
someone needed to step in and put a stop to it.

Regards,

Jeff Waters
